The local money market to-day was decidedly dull. Many of those who have speculated in our money market, thought they saw a good thing in cotton and invested in that fleecy but incomprehensible article all the available means within their reach. This money is still tied by, leaving none to engage in other matters. The customary activity therefore in scrips and stooks has fallen off very materially since the cotton mania set in

some weeks ago. Exchange is steady with snough offering to supply the demand. There is still, however, considerable partiality shown in its distribution, as at some banks there selling at to premium.

at anything under 781.

County Warrants are about the same. In Coffee there is a moderate de-It is expected that a conciderable amount mand and prices steady. Ordinary to will be put upon the market within a choice Rio 19 to 26s, in lots of 5 to 10 few days. We quote at 70@72c buying; selling at 750.

selling at 96@97c. Governments were irregular at the first call but were firm at moon with a better demand and closed still firmer:

Pacific Sixes, Gold opened in New York at 131 o and Fancy brands, 9 50 to \$12.

and interest bid.

actions in Old. Gold in this market is scarce. Dealers Grass \$2.25, Herds \$2. Millet \$3. Lucerne buy at 131c and sell at 132@1321s, with | and White Clover 75c per lb. little or no counter demand, to-day and prices irregular with a strong Sait, 220; Dry Fint, 23 to 24:.

TRADE.

Business to-day was not active. The present weather is too favorable for work to permit the planter to leave his fields E. Carver & Co.'s Improved Cotton Gina in order to visit the city, and most of the goods for plantation use now going to the MacNeale & Urban's Fire land Burgiar interior are bought by order. Fears of an overflow also has a bad effect upon our trade with the river counties, and moved, we may look for a small demand Teagessee thereosi and Kentucky from from that direction. A late St. Louis Circular says :

At no time within the past five years have provisions been so intrinsically strong—the supply so small, the demand so large—and yet at scarcely any period has the market been so demoralized the movement of its trade is such direct opposition to recognized law; and this as we have herein previously stated, cannot be accounted for except upon the hypothesis that too many operators are deficient alike in information and in money. It is unnecessary to review the movements of the trade within the past five months, or to recall facts, fresh within the memory of the most casual observer, to establish the correctness of the position that stocks are not only short, but perhaps deficient, and that the demand, both foreign and domestic, has been and is out of all due proportion to the supply; whilst the means of con-numers have hardly, if ever, been so equal to their wants. Under these cir cumstances, the movements of the trade should be strong, and the average tend-

encies of prices should be upward; and that they will thus eventually be directed, none, save the timid or the weak, appear to doubt. It requires time to effect great changes, and especially to inoni-cate correct notions, not only of general Cotton actor, General Probut of special trade, and it is within the range of possibility that the market may be irregular and depressed until the tarce are weeded out, and the harvest is gathered into the storehouses of strong and observant men, who will greatly profit by the enhanced values of the late sum-

musl, and Baltimore and New Orleans have actually gained strength and shown a disposition to advance, more, however, apparently, in consequence of the falling if in receipts than of any actual contract of the falling in the Druggista all sell | QUININE | mhs

siction of the necessity of enhanced The export demand, under firm and rather better prices at Liverpool, has unbraced not only short clear, clear ribs, and Cumber ands, but sh uiders, and ends materially to reduce stocks at the West, and thus to curtail supplies for the Southers States, the Plains, and the tumber regions, from each of which the orders in prospect are expected to be

arge. Esting APPLES are scarce and in demand. Choice qualities are firm at 6 to 10 per barrel. There is a good supply of medium

grades of BUTTER, but choice is rather carce at 35 to 42 per pound. In BEANS there is no change. Mixed White 2 to \$8 per bushel; Navy 8 25 to \$3 50. We have a dull Provision

BUTTER.

THE **ECONOMY BUTTER CO** 

Ask the attention of a'l interested in the re-duction of the extravagant cost of Hetter, to their practical and economical system of mak-ing pure prime Butter by aid of the

EXTRACT OF BUTTER PLANT.

A brief allusion to the origin of this important discovery may not prove numbered and discovery may not prove numbered ing. Among the authentisated records of the renowned Captain Cook's vayage around the weekl, is found the statement, that works a fourning for a short time on the Brasilian Coast of South America, he observed the natives using, in the preparation of their food, a peculiar oil, which, upon examination, he down to possess the appearance, tasts and flavor of Butter; upon martier inquiry, however, he ascertained that it was simply a substance that the native distilled in a cross and imperfect manner from a red and loweriant plant that warm tropical country. A few years ago an eminent French obsunit, while on a professional visit to the tropics, made numerous experiments with this remarkable production of nature, and succeeded in extracting a concentrated essence of the plant. The formula for its preparation, and the Sole Right for the sale in this country are the exclusive property of this company, by whom it was purchased from the original discovers. We claim for this remarkable, yet simple and perfectly harmless preparation. property of this company, by which it was purchissed from the original discoverer. We claim for this remarkable, yet simple and perfectly harmless preparation—

1st. That by its use a het gain of from 50 to 200 per cent. Is made in the manufacture of Butter.

2d. That Butter, which from age or whalever cause, may be strong, rancid, streaked or coarse-grained, and comparatively usedess for general use by the aid of this Extract is restored to its original ireshness and sweetness, fine-grain and even color.

2d. By the use of the Extract, one pound of delivious, fresh Butter is actually made from one plant of milk.

2d. That a pure and excellent table Butter can be made, at a cost of from 15 to 20 cents per pound. The chief expess a wherein being Butter, which is the essential base.

3th. That Butter manufactured by the aid of this Extract is equal in every respect to the best Butter made by the ordinary method.

3th. The Extract, after the eneminal analysis, by able chemists, is pronounced perfectly treations to being purely of a very table mature.

7th. In proof of the foregoing assertions, the factory of this cumpany is making one ton of Butter per day, which meets with ready sale in the New York market, and is consumed from the tables of the first holes, restaurants and private families in this city and elsewhere. A sample packaze of the Extract; afficient to make fifty peaneds of Sutter), with full directions for use, will be sent to any address on the receipt of \$1.

CAUTION.—As all articles of real merit are subject to spurious limitations, we would specially caution the public against counterfeits and worthless infinitations, devertised as powders, compounds, etc., as the Extract of the Butter Plant is prepared and sold only by
